PERSONAL STATEMENT

Final-year Information Technology undergraduate and Full-Stack Developer with professional experience building production web and mobile applications using PHP Laravel, Angular, JavaScript, Node.js, REST APIs, and relational databases. Experienced in API design, authentication and authorization, Dockerized services, database-driven applications, automated testing, and cloud deployment. Built multiple end-to-end software platforms and published software-engineering research at IEEE ICITR 2024.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP, Python, Java

Front-End Development: Angular, React, Bootstrap, Blade, AJAX, Responsive Web Design

Back-End Development: PHP Laravel, Node.js, Express.js, FastAPI, REST APIs, MVC, API Integration

Databases: PostgreSQL, MySQL, MongoDB, MSSQL, Redis, Firebase Firestore, Neo4j

Testing: Pytest, Unit Testing, Integration Testing, API Testing, Postman, API Dog

Cloud & DevOps: Docker, Google Cloud Platform, Firebase, CI/CD, Git, GitHub Actions

Software Engineering: Object-Oriented Programming, API Design, Microservices, Modular Architecture, Database Design, SDLC, Agile Development, Debugging, Version Control

Mobile Development: Flutter

EXPERIENCE

Full-Stack Developer Intern

Mar 2025 – Nov 2025

Willsj Technologies LLC · Bur Dubai, UAE · Remote

- Engineered and maintained Laravel/MySQL REST APIs across four production applications, implementing business logic, request validation, JWT authentication, role-based authorization, and database-backed workflows.
- Delivered responsive web and mobile features using Blade, Bootstrap, JavaScript, AJAX, and Flutter, integrating frontend workflows with backend APIs across marketplace, e-commerce, business-directory, and bidding products.
- Validated REST endpoints, authentication flows, request handling, and error conditions using Postman and API Dog within a collaborative Git/GitHub development workflow.
- Supported cloud deployment and application services on Google Cloud while contributing across development, integration, testing, debugging, and release activities.

PROJECTS

DepGuard – Software Supply-Chain Analysis Platform

Angular, Laravel, Express.js, Docker

- Built a multi-service dependency analysis platform supporting npm, PHP, Python, Ruby, Go, and Rust ecosystems, combining vulnerability intelligence with behavioral package-risk analysis.
- Designed REST-based services using Angular, Laravel, and Express.js with asynchronous processing, transitive dependency resolution, severity classification, Trust Scoring, and automated remediation recommendations.

Cybersecurity Awareness & Human Firewall Platform

Angular, Node.js, FastAPI, PostgreSQL, Redis,

Docker

- Developed an enterprise full-stack platform using Angular, Node.js/Express, PostgreSQL, Redis, and a Python FastAPI analytics microservice.
- Implemented JWT authentication, RBAC, training management, dashboards, analytics, gamification, incident reporting, audit logging, simulated campaigns, and an explainable AI-based user risk score.

CloudHunt – Cloud Threat Detection & Response Platform

Angular, FastAPI, PostgreSQL, Redis, Neo4j,

- Engineered an Angular and FastAPI application supporting case management, detection workflows, evidence processing, dashboards, and graph-based IAM relationship analysis.
- Designed a Dockerized backend architecture integrating PostgreSQL, Redis, and Neo4j and implemented REST APIs, authentication, asynchronous processing, graph queries, and automated backend tests using Pytest.

Artista – Digital Art Marketplace

Angular, Express.js, MySQL, Firebase, AWS

- Developed a full-stack digital marketplace enabling artists to publish and sell 2D and 3D artwork, including artist registration, user management, artwork categorization, administration, and marketplace workflows.
- Contributed to frontend, backend, database, API integration, and cloud services using Angular, Express.js, MySQL, Firebase, and AWS; project research was published at IEEE ICITR 2024.

EDUCATION

University of Moratuwa

2022 – 2026 (Expected)

B.Sc. (Hons) in Information Technology, Faculty of Information Technology

Maliyadewa Adarsha Maha Vidyalaya, Kurunegala

G.C.E. Advanced Level (2020) – Physical Science – Combined Mathematics A | Chemistry A | Physics C

G.C.E. Ordinary Level (2016) – 8 A | 1 B

CERTIFICATIONS

- **Cybersecurity & Ethical Hacking** – Academy of Future Robotics (4-month course, Grade A+, Nov 2025). Covered vulnerability assessment, cryptography, and network security.
- **Google Cybersecurity** – Foundations of Cybersecurity, Play It Safe: Manage Security Risks, Connect and Protect: Networks and Network Security
- **Cisco** – Security Operations Center (SOC)
- **TryHackMe** – Pre Security Learning Path
