Gihan Shavinda Rathnayake

Full-Stack Software Engineer

+94 70 322 2314 | shavindagihan389@gmail.com | Kurunegala, Sri Lanka

LinkedIn | GitHub | Portfolio | Medium

Summary

Full-stack software engineer specializing in PHP Laravel backends and Angular/React frontends, with experience building REST APIs, authentication and role-based access contro, and realtime features across four live applications during a remote internship.Built three full-stack platforms (Laravel, React, Angular, PostgreSQL, Redis) and co-authored an IEEE-published paper (ICITR 2024); security-minded, test-driven, and comfortable deploying on Google Cloud and Docker.

Technical Skills

Backend: PHP, Laravel (Eloquent, Sanctum, Queues/Jobs, Reverb), Node.js, Express.js, REST APIs, WebSockets, MVC
Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Blade, AJAX
Databases: MySQL, PostgreSQL, MongoDB, Redis, Firebase Firestore
Testing & Tools: Postman, API Dog, Pytest, Unit & Integration Testing, Git, GitHub
Cloud & DevOps: Docker, Google Cloud Platform, AWS, CI/CD, Linux
Practices: Object-Oriented Programming, Agile/Scrum, SDLC, RESTful & Microservices Architecture, Secure Software Development
Also familiar with: Python, FastAPI, scikit-learn, RAG, Semantic Search

Experience

Full-Stack Developer (Intern) – Willsj Technologies LLC Mar 2025 – Nov 2025
Bur Dubai, UAE (Remote)

- Developed REST API endpoints in Laravel and MySQL across 4 production applications (marketplace, e-commerce, business directory, bidding) serving 10k+ users, implementing JWT authentication and role-based authorization.
- Built responsive interfaces with Blade, Bootstrap, JavaScript, AJAX, and Flutter and integrated them with backend APIs, improving mobile usability across all four applications.
- Wrote Postman and API Dog test collections covering authentication, request validation, and error edge cases, catching defects before release within a Git/GitHub pull-request workflow.
- Deployed and maintained services on Google Cloud Platform and contributed across the full SDLC: development, integration, testing, debugging, and release.

Projects

CricIntel AI – Cricket Analytics & Team Management Platform GitHub
Laravel, React, TypeScript, PostgreSQL, Reverb, FastAPI

- Built a multi-role platform for squad selection, ball-by-ball scoring, tournaments, training, and scouting, with realtime notifications over private WebSocket channels and queued jobs.
- Delivered phase-based performance analytics, predictive player/team models (scikit-learn), and report generation.

LifePilot AI – Personal Life Operations & AI Automation Platform GitHub
Laravel, React, TypeScript, PostgreSQL, Redis

- Built Laravel REST APIs (Sanctum auth) and a React/TypeScript frontend managing documents, tasks, expenses, subscriptions, calendar events, and household collaboration.
- Implemented RAG-based semantic search, document extraction, and approval-gated agentic action planning with privacy-aware access control and audit logging.

DepGuard – Software Supply-Chain Analysis Platform GitHub

Angular, Laravel, Express.js

- Built a multi-service platform that analyzes dependencies across 6 ecosystems (npm, PHP, Python, Ruby, Go, Rust) with asynchronous processing and transitive dependency resolution.
- Designed an explainable Trust Scoring engine and automated remediation recommendations combining external vulnerability data with application-level dependency analysis.

Artista – Digital Art Marketplace GitHub

Angular, Express.js, MySQL, Firebase, AWS

- Built a marketplace where artists register, publish, and sell 2D/3D artwork; worked across Angular frontend, Express.js services, MySQL schema design, and AWS components. Related research published at IEEE ICITR 2024.

Cybersecurity Awareness & Human Firewall Platform GitHub

Angular, Node.js/Express, PostgreSQL, Redis, FastAPI

- Developed a full-stack enterprise platform using Angular, Node.js/Express, PostgreSQL, and Redis, with a Python FastAPI analytics microservice for employee training, assessment, and risk reporting.
- Implemented JWT authentication, role-based access control, administrative dashboards, gamification, audit logging, and an explainable AI-based user-risk scoring workflow.

Education

University of Moratuwa – B.Sc. (Hons) in Information Technology 2022 – 2026

Faculty of Information Technology

G.C.E. Advanced Level (2020), Physical Science: Combined Mathematics A | Chemistry A | Physics C

Certifications

- **Google Cybersecurity** – Foundations of Cybersecurity, Play It Safe: Manage Security Risks, Connect and Protect: Networks and Network Security, Tools of the Trade Linux and SQL
- **Cisco** – Security Operations Center (SOC)
- **TryHackMe** – Pre Security Learning Path, Cyber Security 101 Path

Publications

"Artista – Digital Art Marketplace." ICITR 2024, IEEE (co-author). ieeexplore.ieee.org/document/10857770
